

English Conversation – B2 Level

Topic: The Environment

Emma: Have you noticed how climate change is affecting the weather lately?

Liam: Yes, definitely. Summers are getting hotter, and winters are much less predictable.

Emma: I think human activity plays a major role, especially pollution and deforestation.

Liam: I agree. Industrial waste and excessive use of fossil fuels have caused serious damage to the environment.

Emma: What do you think individuals can do to help?

Liam: Small actions matter. For example, people can reduce plastic use, recycle more, and save energy at home.

Emma: Governments also have a responsibility. Strong environmental laws could make a big difference.

Liam: Absolutely. Investing in renewable energy and promoting sustainable practices is essential for the future.

Emma: If we don't act now, the consequences could be irreversible.

Liam: That's true. Protecting the environment is not a choice anymore—it's a necessity.

Discussion Questions (B2)

1. Do you think individuals or governments are more responsible for protecting the environment? Why?
2. What environmental problems are most serious in your country?
3. What changes can people realistically make in their daily lives?
